Coursework Title:	Design Proposal
Course Name:	Human-Computer Interaction
Course Code:	DECO2500/7250
Weighting:	30%
Hand-in Date:	23 September 2022 by 4:00pm (AEST)
Hand-in Method:	Blackboard

1. Introduction

In this task, you are required to form multidisciplinary teams of 3-4 and collectively decide on an issue within a domain that you would like to explore further. The domain that you choose can be from any that have been previously illustrated in the *Research Report* task (e.g., behaviour change, discovering, transacting or health and wellbeing) or you can choose your own.

Teams will need to choose a domain for which you have access to representative users to involve in evaluating your prototype at a later stage. The purpose of this task is to produce a short design proposal that should include evidence of identifying the problem and your solution, as well as prototyping with increasing fidelity. The purpose of the design proposal is to convince the board at your technology company that:

- the project has clear objectives
- the project is worth doing (it is significant/important in some sense)
- the proposed system is suitable and feasible

At the end of this task, your team should have a prototype that you are ready to take to the next stage of evaluation, which will occur during the next assignment. Your team must submit one document that represents the work of the entire team on Blackboard on or before the due date/time.

2. Learning Objective Being Assessed

1. Understand, adapt, and apply principles of good user-interface design.
2. Relate cognitive, social, behavioural, and emotional theories to the design of effective human-system interaction.
3. Use a range of design research methods, which involve the people from target user groups – such as ethnography, contextual inquiry, interviews, and surveys – in the process of interactive system design.
4. Apply iterative interaction design techniques, such as scenario development, prototyping, and participatory design in the design of an interactive system.
5. Understand the role of, and demonstrate proficiency at, evaluation (user and expert) in the development of interactive systems: implement an evaluation framework that is appropriate for a given set of objectives, analyse the results of those evaluation methods in terms of establishing design and system requirements, and report those results and analysis.
6. Apply HCI knowledge, in terms of system accessibility, within appropriate user-interface design for a broad range of user groups.
7. Demonstrate an ability to work collaboratively and effectively with others in a team towards shared project goals, while managing individual work

3. Details of the Task

In this task, you are required to produce *one* report that details your team's design process. This is a brief overview of what you need to complete and produce for this report, bearing in mind these are general phases, but iteration may occur throughout one or more phases. You will need to develop *your own* process based on your knowledge.

Within your design proposal, you are required to deliver:

- **Overview**

Specify the context of use: for example, what is the challenge/problem space? Why is it important and what is needed? Who are the people who will use your system? What are their needs and values? What will they use your system for? What are the objectives of the system? etc.

- **Background**

What systems already exist in your domain? What are the limitations of existing systems?

- **Requirements**

Develop your system requirements (e.g., system concept, design guidelines, system requirements, etc.). You should also include detail about user experience (UX), such as UX goals, relevant metrics, personas, and interaction scenarios.

- **Prototyping**

This part of the process may be done in stages, building from *medium fidelity wireframes* to a complete *high-fidelity* prototype that should represent the complete design, including functionality. You should ensure your prototyping includes detail of the user interface (UI) design and interactivity, including diagrammatic representations of the system's interaction flow. This interactivity must support navigation to different interfaces, including the main interactions that a person will perform with your system. You should bring in principles of UI design that supports the user experience (UX).

This prototype should effectively present both the proposed user interfaces as well as the core functionality of the application. Therefore, the prototype should be of sufficient fidelity to allow the board to clearly visualise your conceptual design and to understand the intended user experience.

Note – it is your decision/choice about whichever software you choose to develop your prototype in.

- **Team Progress**

As a team, roles should be established early, and progress should be documented at weekly checkpoints in studio. This information should be attached to the report as supplementary information in an appendix.

  - ***Team Charter***

    This charter sets up the "ground rules" for your team: how you communicate, when you meet, and how you will resolve issues. It really is the guide to how your team is going to work. This should be completed early. Teams should plan from the start about how to deal with the unavailability of team members (e.g., due to illness). This charter will follow your team throughout this assessment and the later Evaluation

assignment. A template has been provided on Blackboard. **This charter should be submitted to Blackboard by the end of your studio in week 6.**

- ***Meeting Logs***

  Your team will need to maintain logs of your weekly activities. These logs should record: items discussed/worked on, issues that arose, actions required, and deliverables/plan to be completed by the next week, including team member allocation to tasks/deliverables. A template has been provided on Blackboard. **A draft of your team's weekly meeting log should be submitted via Blackboard by the end of your studio each week that documents progress that has been made in the studio**. Note – additional progress made throughout the week (outside of studio time) should also be included and updated in these logs. **The final versions must be included in the appendix of the report.** Any team member may submit on behalf of the team each week.

  When submitting your Team Charter and Meeting Logs please use identifiable file names, such as *DECO2500-7250_Team Charter_[insert Team Name].pdf* and *DECO2500-7250_Meeting Log_[insert Team Name]_[insert week #].docx*

As stated in the ECP: *The Course Coordinator reserves the right to vary grades for group members in the event of varied contributions and/or lack of communication to verify contribution to team effort.*

- **Report Guidelines**

The main body of your report should not exceed 16 pages (excluding title page, contents, references, and appendix). The report should be suitably formatted, structured logically and be free from grammar and spelling errors. To prepare your report, you are advised to use a word processor (such as Microsoft Word or OpenOffice/LibreOffice) that supports spelling and grammar checking.

You are also required to appropriately reference all resources and personal communication in your report and include a reference list. IEEE referencing style is recommended but not required. It is your choice what referencing style you ultimately use. Whichever style you choose, ensure you are consistent throughout your document.

4. What You Should Hand In

You should submit a **single electronic file** on Blackboard on or before the due date/time.

Your submission must be a single word-processed document that contains your team's report (e.g. Microsoft Word (.docx) or Pages (.pages) formats only).

No other forms of submission are allowed without prior written permission from the course coordinator.

5. Grading Scheme/Assessment Criteria*

Assessment Criteria		% weighting for criteria
Report	Problem Identification	20
	Requirements	20
	Prototyping	20

	Professionalism of Report	20
	Teamwork	20

**please refer to the rubric on page 6–8 for a detailed breakdown of each criteria*

6. Guidelines

- Correctly reference any resources that you use.

7. Resources Required

Making use of these specific tools and resources may be helpful for completing the task:

- Lecture/Studio Materials
- The Internet
- Course-specific textbooks
- UQ Resources, such as:
  - https://my.uq.edu.au/information-and-services/student-support/study-skills/assignment-writing/assignment-types
  - https://my.uq.edu.au/information-and-services/student-support/study-skills/assignment-writing
  - https://my.uq.edu.au/information-and-services/student-support/study-skills
  - https://web.library.uq.edu.au/research-tools-techniques/google-scholar
  - https://guides.library.uq.edu.au/referencing
  - https://www.edx.org/course/working-in-teams-a-practical-guide

8. Late Submission/Extenuating Circumstances

The submission of progressive assessment material on the due date, as set out in the Electronic Course Profile (ECP), is the sole responsibility of the student. Students should not leave assignment preparation until the last minute and must plan their workloads to meet advertised or notified deadlines. It is your responsibility to manage your time effectively.

Where the assessment item is submitted after the deadline, without an approved extension, a late penalty will apply. The late penalty shall be one grade will be deducted from the grade for the assessment item per calendar day (or part thereof). A day is considered to be a 24-hour block from the assessment item due time. E.g., if you originally received a Credit but your submission was late and within 24 hours you will lose one grade and will be awarded a Pass. If you are over 24 hours late, you will continue to lose one grade in this way per 24-hour block until the end of the scale is reached. Negative grades will not be awarded.

Please refer to the ECP for full details about the University's policies and guidelines regarding assessment.

9. Academic Misconduct

The University defines Academic Misconduct as involving 'a range of unethical behaviours that are designed to give a student an unfair and unearned advantage over their peers'.

This includes attempting to gain marks as part of a team without contributing. The University takes Academic Misconduct very seriously and any suspected cases will be investigated through the University's standard policy. If you are found guilty, you may be expelled from the University with no award.

It is the responsibility of the student to ensure that you understand what constitutes Academic Misconduct and to ensure that you do not break the rules. If you are unclear about what is required, please ask.

It is also the responsibility of the student to take reasonable precautions to guard against unauthorised access by others to his/her work, however stored in whatever format, both before and after assessment.

10. Design Proposal Grading Criteria

Criteria/ Weighting	High Distinction *Demonstrated evidence of **exceptional** achievement in relation to assessment criteria*	Distinction *Demonstrated evidence of **advanced** achievement in relation to assessment criteria*	Credit *Demonstrated evidence of **proficient** achievement in relation to assessment criteria*	Pass *Demonstrated evidence of **functional** achievement in relation to assessment criteria*	Fail ***Minimal to Absence** of evidence of achievement in relation to assessment criteria*	X (None) *No assessable work has been received*
Problem Identification (20%)	Research has demonstrated **exceptional** breadth and illustrates **mastery** of the content in the area of HCI. Your application of this research captures **superior** detail to enable a **thorough** understanding of the problem you have identified, people and context.	Research has demonstrated an **advanced** level of breadth and illustrates **substantial** knowledge of fundamental concepts in the area of HCI. Your application of this research captures a **suitable** level of detail to enable a **reasonable** understanding of the problem you have identified, people and context.	Research has demonstrated a **competent** level of breadth and illustrates **good** knowledge of fundamental concepts in the area of HCI. Your application of this research captures **adequate** detail to enable a **satisfactory** understanding of the problem you have identified, people and context.	Research has demonstrated an **acceptable** level of breadth and illustrates **adequate** knowledge of fundamental concepts in the area of HCI. Your application of this research captures **minimal** detail to enable a **limited** understanding of the problem you have identified, people and context.	Research has demonstrated a **severe lack** of detail and illustrates **deficiencies** or **no demonstratable evidence** of understanding of the fundamental concepts in the area of HCI. Your application of this research is **severely lacking** and **does not demonstrate** an understanding of the problem you have identified, people and context.	This component is missing
Requirements (20%)	Requirements are **clearly** linked to the research undertaken/problem identified. Requirements have been presented to an **exceptional** standard and are **highly detailed** to demonstrate **creative** application of knowledge and skills.	Requirements are **mostly** linked to the research undertaken/problem identified. Requirements have **mostly** been presented to a **very high** standard and are **very detailed** to demonstrate **extensive** application of knowledge and skills.	Requirements are **largely** linked to the research undertaken/problem identified. Requirements have **largely** been presented to a **suitable** standard and are **suitably detailed** to demonstrate **effective** application of knowledge and skills.	Requirements are **barely** linked to the research undertaken/problem identified. Requirements have **barely** been presented to an **acceptable** standard and are **satisfactorily detailed** to demonstrate **acceptable** application of knowledge and skills.	Requirements **are not** linked to the research undertaken/problem identified. Requirements **have not** been presented to an acceptable standard and are **severely lacking detail** to demonstrate an **inability** to apply knowledge and skills.	

Criteria/ Weighting	High Distinction *Demonstrated evidence of **exceptional** achievement in relation to assessment criteria*	Distinction *Demonstrated evidence of **advanced** achievement in relation to assessment criteria*	Credit *Demonstrated evidence of **proficient** achievement in relation to assessment criteria*	Pass *Demonstrated evidence of **functional** achievement in relation to assessment criteria*	Fail ***Minimal to Absence** of evidence of achievement in relation to assessment criteria*	X (None) *No assessable work has been received*
Prototyping (20%)	Prototype provides an **exceptional** representation of the design, including interactions, user interface (UI) design that supports user experience (UX) and functionality. Demonstrates **creative** application of knowledge and skills.	Prototype provides an **advanced** representation of the design and **mostly** conveys aspects of interactions, user interface (UI) design that supports user experience (UX) and functionality. Demonstrates **extensive** application of knowledge and skills.	Prototype provides a **competent** representation of the design and **generally** conveys aspects of interactions, user interface (UI) design that may support user experience (UX) and functionality. Demonstrates **effective** application of knowledge and skills.	Prototype provides an **acceptable** representation of the design. Conveys a **limited** representation of aspects of interactions and/or user interface (UI) design that supports limited user experience (UX) and/or functionality. Demonstrates **acceptable** application of knowledge and skills.	Prototype is **severely lacking** detail. As such, the representation of the design **does not** effectively convey aspects of either interactions or user interface (UI) design that could support user experience (UX) or functionality. Demonstrates an **inability** to apply knowledge and skills.	The component is missing
Professionalism of Report (20%)	The report has been presented to an **exceptional** standard. It has been organised **very well** and in a logical manner and is **highly** easy to follow. It communicates at an **expert** level with minimal to no spelling/grammar errors. The page limit has been adhered to **well**.	The report has been presented to an **advanced** standard. It has been organised **quite well** and is **very** easy to follow. It communicates at a **professional** level. May contain limited spelling/ grammar errors. The page limit has been **reasonably** adhered to.	The report has been presented to a **competent** standard. It has been organised **well** and is **quite** easy to follow. It communicates at an **effective** level. May contain some spelling/ grammar errors. The page limit has been **mostly** adhered to.	The report has been presented to an **acceptable** standard. It has been organised **adequately** but may be hard to follow. It communicates at an **appropriate** level. May contain numerous spelling/grammar errors. The page limit **has not** been adhered to well.	The report **fails** to meet the standard at this level. It is **disorganised** and communicates information or ideas in ways that are frequently incomplete, confusing, and not appropriate. Written expression is **disjointed,** and the report is badly structured with constant errors in spelling/grammar.	

Criteria/ Weighting	High Distinction *Demonstrated evidence of **exceptional** achievement in relation to assessment criteria*	Distinction *Demonstrated evidence of **advanced** achievement in relation to assessment criteria*	Credit *Demonstrated evidence of **proficient** achievement in relation to assessment criteria*	Pass *Demonstrated evidence of **functional** achievement in relation to assessment criteria*	Fail ***Minimal to Absence** of evidence of achievement in relation to assessment criteria*	X (None) *No assessable work has been received*
Teamwork (20%)	The team is functioning **exceptionally well**. The team has demonstrated **exceptional** proactive conflict resolution strategies (if applicable). Team charter has been completed. Meeting logs demonstrate an **exceptional** level of detail in the account of team activities and meeting drafts have been submitted on time.	The team is functioning **very well**. The team has demonstrated **advanced** proactive conflict resolution strategies (if applicable). Team charter has been completed. Meeting logs demonstrate a **very detailed** account of team activities and meeting drafts have been submitted on time.	The team is functioning **quite well**. The team has demonstrated **competent** conflict resolution strategies (if applicable). Team charter has been completed. Meeting logs demonstrate a **suitable** account of team activities and meeting drafts have mostly been submitted on time.	The team is functioning **adequately**. The team has demonstrated **acceptable** conflict resolution strategies (if applicable). Meeting logs demonstrate a **limited** account of team activities. Team charter may not have been wholly completed. Meeting drafts may be sketchy or incomplete.	The team has **failed** to sufficiently function. The team **has not** demonstrated any conflict resolution strategies (if applicable). Meeting logs demonstrate a **severely lacking** account of team activities or are largely missing. Team charter has not been completed or is incomplete. Meeting drafts are inadequate.	The component is missing
