Coursework Title:	Evaluation
Course Name:	Human-Computer Interaction
Course Code:	DECO2500/7250
Weighting:	35%
Course Coordinator:	Dr Nell Baghaei
Contact:	Room: 78-304
Hand-in Date:	Presentation in week 13 studio
	Submission: On Blackboard by 7 November 2022 by 4:00pm (AEST)

1. Introduction

At this stage of the course, your team should have a prototype that you are ready to take to this next stage of evaluation. In this task, within your teams, you will be undertaking various activities to evaluate your prototype and interpret the results. The purpose of the evaluation is to convince the board at your technology company that your prototype has been thoroughly evaluated and advise of further revisions that are required before moving to actual development of the system.

Your team must submit one document that represents the work of the entire team via Blackboard on or before the due date/time. Your team is also required to present a summary of your project/findings in your designated studio session *during week 13*.

2. Learning Objective Being Assessed

1. Understand, adapt, and apply principles of good user-interface design.
2. Relate cognitive, social, behavioural, and emotional theories to the design of effective human-system interaction.
3. Use a range of design research methods, which involve the people from target user groups – such as ethnography, contextual inquiry, interviews, and surveys – in the process of interactive system design.
4. Apply iterative interaction design techniques, such as scenario development, prototyping, and participatory design in the design of an interactive system.
5. Understand the role of, and demonstrate proficiency at, evaluation (user and expert) in the development of interactive systems: implement an evaluation framework that is appropriate for a given set of objectives, analyse the results of those evaluation methods in terms of establishing design and system requirements, and report those results and analysis.
6. Apply HCI knowledge, in terms of system accessibility, within appropriate user-interface design for a broad range of user groups.
7. Demonstrate an ability to work collaboratively and effectively with others in a team towards shared project goals, while managing individual work

3. Details of the Task

In this task, you are required to 1) produce *one* report that details your team's evaluation process and 2) present a summary of your project in week 13. This is a brief overview of what you need to complete and produce for this report.

3.1 Evaluation Report

Within your evaluation report, you are required to deliver:

- **Executive Summary**

  Write a paragraph (no more than 500 words) that summarises: the context and domain of your prototype, the human problems it is attempting to address, a high-level overview of the evaluation approach and outcomes, and at least one recommendation for action arising from the evaluations.

- **Evaluation Plan**

  What is the purpose of the evaluations? What evaluation methods will you use (and why)? See Appendix A for a suggested process of what to think about during the planning phase (do not copy and include this information in your report).

- **Evaluation Activities**

  Using your prototype from the Design Proposal task, your team should undertake an evaluation of your intended system in order to gather feedback from potential users. Your evaluation should be particularly focused on the interactions, the UI/UX and metrics and measures that you have identified as part of your design proposal. Your evaluation should be composed of *multiple* activities in order to gather comprehensive feedback about your system.

- **Results**

  Once you have completed your evaluation activities to collect data on user feedback, you should analyse your data to produce a set of results and interpret those. Based on the results of your evaluation, you should provide a critical discussion about what your results mean and what was learned.

- **Future Directions**

  You should conclude your report with a summary of your findings and additional information that you have identified through the evaluation process, such as (but not limited to) the user, their needs, and contexts of use, and identify areas that should be considered and investigated for iteration two.

- **Team Progress**

  Team progress should be documented at weekly checkpoints in studio. The roles originally assigned to team members in your *Team Charter* from the Design Proposal task will still be applicable during this task. However, if you want to change your team roles for this task then your team should include an updated *Team Charter* in the appendix of your report. If your roles have not changed during this task, you do not need to include the *Team Charter* document again in this task.

  The following information should be provided in the report as supplementary information in the appendix:

  - ***Meeting Logs***

    Your team will need to maintain logs of your weekly activities. These logs should record: items discussed/worked on, issues that arose, actions required, and deliverables/plan to be completed by the next week, including team member

allocation to tasks/deliverables. A template has been provided on Blackboard. **A draft of your team's weekly meeting log should be submitted via Blackboard by the end of your studio each week that documents progress that has been made in the studio**. Note – additional progress made throughout the week (outside of studio time) should also be included and updated in these logs. **The final versions must be included in the appendix of the report.** Any team member may submit on behalf of the team each week.

When submitting your draft Meeting Logs please use identifiable file names, such as *DECO2500-7250_Meeting Log_[insert Team Name]_[insert week #].docx*

- ***Individual Reflection***

Each team member **must** include an individual reflection of no more than 2 pages that details your contributions to the project, as part of the Evaluation Report. In this individual reflective piece, you must explain what you individually contributed to your team project, how it fits within the bigger picture of the entire project and what you would do differently if you went back in time, as well as any conflict resolution strategies that were applied and the outcomes (if applicable). This is not about convincing us how much work you did, and/or complaining about how little work another team member did, but how you developed skills, such as teamwork strategies, abilities etc. Please contact the Course Coordinator if you do not feel comfortable submitting your reflection within the project report.

Individual hurdle: In the case where a team member does not submit an individual reflection then that team member will receive a zero (X) for their Teamwork component grade AND their overall individual grade for the entire Evaluation assessment will also be capped at a Pass (regardless of performance in other components of the task).

As stated in the ECP: *The Course Coordinator reserves the right to vary grades for group members in the event of varied contributions and/or lack of communication to verify contribution to team effort.*

- **Report Guidelines**

The main body of your report should not exceed 20 pages (excluding title page, contents, references, and appendix). The report should be suitably formatted, structured logically and be free from grammar and spelling errors. To prepare your report, you are advised to use a word processor (such as Microsoft Word or OpenOffice/LibreOffice) that supports spelling and grammar checking.

You are also required to appropriately reference all resources and personal communication in your report and include a reference list. IEEE referencing style is recommended but not required. It is your choice what referencing style you ultimately use. Whichever style you choose, ensure you are consistent throughout your document.

- **Implementation of your prototype *(optional)***

We do not assess your programming skills in this course. However, there will be some bonus points awarded to the teams who have a go at implementing their prototype (using the programming language of their choice). If you decide to go ahead, please include the link to the source code and working product in your Evaluation Report.

3.2 Presentation

During *teaching week 13* (24 – 28 October 2022), within your allocated studio, your team will present a summary of your project in class. Your presentation materials should provide a summary of your project, including results of your evaluation. Each team will be allocated 10-15 minutes in total.

All team members are expected to contribute (in terms of preparation and delivery) of this presentation. *The Course Coordinator reserves the right to vary individual grades of the presentation component based on individual contribution (or lack thereof).*

4. What You Should Hand In

Evaluation Report: You should submit a **single electronic file** via Blackboard on or before the due date/time. Your submission must be a single word-processed document that contains your team's report (e.g., Microsoft Word (.doc/.docx) or Pages (.pages) formats only).

No other forms of submission are allowed without prior written permission from the course coordinator.

5. Grading Scheme/Assessment Criteria*

Assessment Criteria		% Weighting for Criteria
Report	Evaluation Plan	15
	Evaluation Activities	15
	Results	15
	Future Directions	15
	Professionalism of Report	10
	Teamwork	15
Presentation		15

**please refer to the rubric on pages 7–9 for a detailed breakdown of each criteria*

6. Guidelines

- Correctly reference any resources that you use.

7. Resources Required

Making use of these specific tools and resources may be helpful for completing the task:

- Lecture/Studio Materials
- The Internet
- Course-specific textbooks
- UQ Resources, such as:
  - https://my.uq.edu.au/information-and-services/student-support/study-skills/assignment-writing/assignment-types

- https://my.uq.edu.au/information-and-services/student-support/study-skills/assignment-writing
- https://my.uq.edu.au/information-and-services/student-support/study-skills
- https://web.library.uq.edu.au/research-tools-techniques/google-scholar
- https://guides.library.uq.edu.au/referencing
- https://www.edx.org/course/working-in-teams-a-practical-guide

8. Late Submission/Extenuating Circumstances

The submission of progressive assessment material on the due date, as set out in the Electronic Course Profile (ECP), is the sole responsibility of the student. Students should not leave assignment preparation until the last minute and must plan their workloads to meet advertised or notified deadlines. It is your responsibility to manage your time effectively.

Where the assessment item is submitted after the deadline, without an approved extension, a late penalty will apply. The late penalty shall be one grade will be deducted from the grade for the assessment item per calendar day (or part thereof). A day is considered to be a 24-hour block from the assessment item due time. E.g., if you originally received a Credit but your submission was late and within 24 hours you will lose one grade and will be awarded a Pass. If you are over 24 hours late, you will continue to lose one grade in this way per 24-hour block until the end of the scale is reached. Negative grades will not be awarded.

Please refer to the ECP for full details about the University's policies and guidelines regarding assessment.

9. Academic Misconduct

The University defines Academic Misconduct as involving 'a range of unethical behaviours that are designed to give a student an unfair and unearned advantage over their peers'.

This includes attempting to gain marks as part of a team without contributing. The University takes Academic Misconduct very seriously and any suspected cases will be investigated through the University's standard policy. If you are found guilty, you may be expelled from the University with no award.

It is the responsibility of the student to ensure that you understand what constitutes Academic Misconduct and to ensure that you do not break the rules. If you are unclear about what is required, please ask.

It is also the responsibility of the student to take reasonable precautions to guard against unauthorised access by others to his/her work, however stored in whatever format, both before and after assessment.

10. Evaluation Grading Criteria

Criteria/ Weighting	High Distinction *Demonstrated evidence of **exceptional** achievement in relation to assessment criteria*	Distinction *Demonstrated evidence of **advanced** achievement in relation to assessment criteria*	Credit *Demonstrated evidence of **proficient** achievement in relation to assessment criteria*	Pass *Demonstrated evidence of **functional** achievement in relation to assessment criteria*	Fail ***Minimal to Absence** of evidence of achievement in relation to assessment criteria*	X (None) *No assessable work has been received*
Evaluation Plan (15%)	Evaluation plan captures **superior** detail to enable a **thorough** understanding of the evaluation activities that will take place.	Evaluation plan captures a **suitable** level of detail to enable a **reasonable** understanding of the evaluation activities that will take place.	Evaluation plan captures **adequate** detail to enable a **satisfactory** understanding of the evaluation activities that will take place.	Evaluation plan captures **minimal** detail to enable a **limited** understanding of the evaluation activities that will take place.	Evaluation plan is **severely lacking** and **does not demonstrate** an understanding of the evaluation activities that will take place.	This component is missing
Evaluation Activities (15%)	The background, rationale, protocol, and collection of data have **all** been presented to an **exceptional** standard.	The background, rationale, protocol, and collection of data have **mostly** been presented to a **very high** standard.	The background, rationale, protocol, and collection of data have **largely** been presented to a **suitable** standard.	The background, rationale, protocol and/or collection of data have **barely** been presented to an **acceptable** standard.	Required evaluations have **NOT** been completed AND/OR do not sufficiently meet the requirements.	
Results (15%)	Analysis of data demonstrates **expert** application of knowledge and skills. **Expert** and **critical evaluation** of results and their implications has been presented.	Analysis of data demonstrates **extensive** application of knowledge and skills. **Critical evaluation** of test results and their implications has been presented.	Analysis of data demonstrates **effective** application of knowledge and skills. **Considered evaluation** of test results and/or their implications has been presented.	Analysis of data demonstrates **acceptable** application of knowledge and skills. **Limited evaluation** of test results and/or their implications has been presented.	Analysis of data has **NOT** been completed AND/OR does not sufficiently meet the requirements.	
Future Directions (15%)	Future directions are **highly detailed** and demonstrates **creative** application of knowledge and skills. Has been presented to an **exceptional** standard.	Future directions are **very detailed** and demonstrates **extensive** application of knowledge and skills. Has **mostly** been presented to a **very high** standard.	Future directions are **suitably detailed** and demonstrates **effective** application of knowledge and skills. Has **largely** been presented to a **suitable** standard.	Future directions are **satisfactorily detailed** and demonstrates **acceptable** application of knowledge and skills. Has **barely** been presented to an **acceptable** standard.	Future directions are **severely lacking detail** and demonstrates an **inability** to apply knowledge and skills and **does not sufficiently** meet the requirements.	

Criteria/ Weighting	High Distinction *Demonstrated evidence of **exceptional** achievement in relation to assessment criteria*	Distinction *Demonstrated evidence of **advanced** achievement in relation to assessment criteria*	Credit *Demonstrated evidence of **proficient** achievement in relation to assessment criteria*	Pass *Demonstrated evidence of **functional** achievement in relation to assessment criteria*	Fail ***Minimal to Absence** of evidence of achievement in relation to assessment criteria*	X (None) *No assessable work has been received*
Professionalism of Report (10%)	The report has been presented to an **exceptional** standard. It has been organised **very well** and in a logical manner and is **highly** easy to follow. It communicates at an **expert** level with minimal to no spelling/grammar errors. The page limit has been adhered to **well**.	The report has been presented to an **advanced** standard. It has been organised **quite well** and is **very** easy to follow. It communicates at a **professional** level. May contain limited spelling/ grammar errors. The page limit has been **reasonably** adhered to.	The report has been presented to a **competent** standard. It has been organised **well** and is **quite** easy to follow. It communicates at an **effective** level. May contain some spelling/ grammar errors. The page limit has been **mostly** adhered to.	The report has been presented to an **acceptable** standard. It has been organised **adequately** but may be hard to follow. It communicates at an **appropriate** level. May contain numerous spelling/grammar errors. The page limit **has not** been adhered to well.	The report **fails** to meet the standard at this level. It is **disorganised** and communicates information or ideas in ways that are frequently incomplete, confusing, and not appropriate. Written expression is **disjointed,** and the report is badly structured with constant errors in spelling/grammar.	The component is missing
Teamwork (15%)	The team has functioned **exceptionally well**. The team has demonstrated **exceptional** proactive conflict resolution strategies (if applicable). Weekly logs demonstrate an **exceptional** level of detail in the account of team activities. Individual reflection is **highly detailed** to verify team outcomes.	The team has functioned **very well**. The team has demonstrated **advanced** proactive conflict resolution strategies (if applicable). Weekly logs demonstrate a **very detailed** account of team activities. Individual reflection is **very detailed** to verify team outcomes.	The team has functioned **quite well**. The team has demonstrated **competent** conflict resolution strategies (if applicable). Weekly logs demonstrate a **detailed** account of team activities. Individual reflection is **suitably detailed** to verify team outcomes.	The team has functioned **adequately**. The team has demonstrated **acceptable** conflict resolution strategies (if applicable). Weekly logs demonstrate a **limited** account of team activities. Individual reflection is **satisfactorily detailed** to verify team outcomes.	The team has **failed** to sufficiently function. The team **has not** demonstrated any conflict resolution strategies (if applicable). Weekly logs demonstrate a **severely lacking** account of team activities or are missing. Individual reflection is **severely lacking detail** by containing little to no information to verify team outcomes.	

Criteria/ Weighting	High Distinction *Demonstrated evidence of **exceptional** achievement in relation to assessment criteria*	Distinction *Demonstrated evidence of **advanced** achievement in relation to assessment criteria*	Credit *Demonstrated evidence of **proficient** achievement in relation to assessment criteria*	Pass *Demonstrated evidence of **functional** achievement in relation to assessment criteria*	Fail ***Minimal to Absence** of evidence of achievement in relation to assessment criteria*	X (None) *No assessable work has been received*
Presentation (15%)	**Coherent** communication in the delivery of the presentation. Presentation is **very well structured**, with slides that communicate at an **expert** level. Language used is **wholly appropriate** to the target audience.	**Clear** communication in the delivery of the presentation. Presentation is **well structured**, with slides that communicate at a **professional** level. Language used is **mostly appropriate** to the target audience.	**Competent** communication in the delivery of the presentation. Presentation is **suitably structured**, with slides that communicate at an **effective** level. Language used is **appropriate** to the target audience.	**Adequate** communication in the delivery of the presentation. Presentation is **adequately structured**, with slides that communicate at an **appropriate** level. Language used may be **lacking appropriateness** to the target audience.	The presentation is **disorganised,** and information/ideas are communicated in ways that are frequently incomplete, confusing, and not appropriate. Slides **fail** to meet the standard at this level.	The component is missing

Appendix A – Suggested Evaluation Process (do not copy this text into your report)

In order to gather feedback, you will need to evaluate your high-fidelity prototype. A suggested process that can be followed for your evaluations is detailed below.

1. **Decide on the evaluation methods you will use** – You need to first decide on the evaluation methods that you will use. You should aim to use a variety of methods to evaluate your prototype and consider the appropriateness of the methods chosen.

2. **Create a protocol for your evaluation session** – You should set out a protocol that outlines how the evaluations are going to run, and then you need to follow that protocol each time you run the evaluations. This ensures that the results you obtain are reliable and comparable. For example, if each time you ask a user to complete a task, so that you can time how long it takes for the task to be completed, you change the instructions that you provide, then it is not really appropriate for you to compare the results or calculate an average based on all results. Therefore, before you start any evaluation, you need to create a clear and detailed protocol or step-by-step guide to how the evaluation will run.

3. **Undertake the evaluation** – Ideally, you should evaluate your prototype using people who are representative of your targeted user. In completing your evaluation, make sure that you follow your protocol and gain verbal consent (we do *not* require written consent for this course). Testing your protocol before you begin your evaluations can prevent you having to find more participants as you go.

   You should aim to involve at least *five (5)* participants in your evaluation, but you should consider involving more if you can, as this will give you better information for the future design and development of your app/system. Most importantly, you should involve a diverse set of people in your evaluations.

You should include in your report some background to the evaluation method you have chosen to use, including (but not limited to):

- How they are conducted
- What information they provide
- Why you have chosen this method
- Whether you have made any variations to the methods and, if so, your rationale for doing so

You should also include in your report:

- A summary outlining the outcomes of your process
- Your detailed evaluation protocol, including interview questions, surveys and the scripts for the introductions and instructions provided
- Details of any changes made to protocols including rationales
- All notes taken in interviews, observations, responses to surveys, records of outcomes of evaluations, etc. (these need not be transcribed but can be images of handwritten notes)
- Results/analysis/interpretation of your data

Note – you do not need to include all of this information in the main body of your report. You need to decide what information is supplementary and can be included in the appendix.
